A NEW CONTINENT MAY BE ADDED SHORTLY TO THE WORLD

The dark shaded oval at the right of this map shows where the new continent is expected to be found. The result of Earthquake Activity in the Region of the Philippines-South-eastward Toward the Middle of the Pacific Ocean.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The Quay and Harbor at Nunsin Also shows the Earthquake Activity on the West Coast of Mexico.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.

The new continent is expected to be discovered shortly. The result of earth震 activity in the region of the Philippines-South-eastward toward the middle of the Pacific Ocean.
A NEW CONTINENT MAY BE ADDED SHORTLY TO THE WORLD

(Continued from Page 3)

A French officer of artillery, Count de Montossus de Ballore, spent a better part of his lifetime compiling the beginnings on an earthquake geography. He compiled 170,000 records of shocks to show the districts in which they occurred most frequently. His maps indicate that the earthquake belts encircle the earth. The belts around the Mediterranean, the Caucasus and Himalayas. The study surrounds the Pacific and extends from New Zealand downward to the Antarctic. This is the so-called "fire ring of the Pacific." By its delineations the theory of an inter-relationship of earthquakes and volcanic disturbances at widely separated points was established.

In the meantime E. O. Hovey of the American Museum of Natural History in this city had visited Mount Etna, Mar
