AMERICA'S GREAT SCIENTISTS RAPIDLY DECREASING

Dr. James McKeen Catell of Columbia Says There Are Fewer Men of Distinction in Scientific Lines Than There Were Seven Years Ago.

The Smithsonian Institution, Washington.

...not only to the growth of the number of men of science, but also to the growth of the number of men of science. In 1900, the number of men of science was probably less than 1,000,000, but in 1910 it is probably more than 1,500,000. The growth of the number of men of science is due to the growth of the number of men of science...
