OLD AGE A PREVENTABLE DISEASE, SAYS DR. LORAND

Austrian Physician Says It Can Be Treated Like Other Maladies, and That We Can Live to the Century Mark.

Dr. Lorand of Vienna has spent much time in studying the problem of old age, and he believes it can be treated like other maladies.

The best way to prevent old age is to prevent the disease. In the case of old age, disease is a result of bad habits, lack of exercise, and poor diet. If you want to prevent old age, you must change your habits, exercise regularly, and eat a healthy diet.

"The best way to prevent old age is to prevent the disease. In the case of old age, disease is a result of bad habits, lack of exercise, and poor diet. If you want to prevent old age, you must change your habits, exercise regularly, and eat a healthy diet."

Dr. Lorand believes that the key to preventing old age is to live a healthy lifestyle. He recommends that people eat a balanced diet, exercise regularly, and avoid bad habits such as smoking and drinking.
