SECRET SERVICE METHODS IN NEW YORK'S POLICE SYSTEM

What Deputy Commissioner Flynn Has Done and Is Doing in Reorganizing the Detective Force Along Lines Followed by the U.S. Government.

In a series of articles that will be published in coming weeks, The Times will examine the methods by which the Secret Service of the Department of Justice, under the direction of Deputy Commissioner William J. Flynn, is making the U.S. Government's police officers more effective and efficient.

Flynn has been at the forefront of this effort, which began in the early months of his tenure. He has worked closely with the police departments of New York and other cities to improve their detective divisions. His approach has been characterized by a strong emphasis on training and organization.

Flynn's reforms have included the establishment of a centralized system for handling police reports, the introduction of a uniform system for record-keeping, and the implementation of a more systematic approach to the investigation of crimes.

The results of Flynn's efforts have been impressive. Crime rates in New York have been on the decline, and the police departments that have adopted his methods have reported significant increases in the number of solved cases.

Flynn's approach to the problem of crime is based on the belief that effective police work requires a combination of training, organization, and the application of modern techniques.

The Times will continue to report on the progress of Flynn's reforms, and will examine the challenges that remain to be addressed.
